## DETAILED ACTION

### *Double Patenting*

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1, 7-13, and 15 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-3, 9-13, and 15 of prior U.S. Patent No. 6554208. This is a double patenting rejection.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 2-6, 14, 16-50 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 25 of U.S. Patent No. 6554208. Although the conflicting claims are not identical, they are not patentably

distinct from each other because the '208 does not specifically claim conduits connected to the compressor to deliver the composition from the conduits to the stationary nozzle. However, based on the function of the spray chamber, the examiner has reasonable basis to conclude, the chamber would also necessarily include a conduit. Thus, one of ordinary skill in the art would have been motivated to provide the conduits as they are necessary to provide a means for delivering the composition to the spray nozzle.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 16, 33, 35 are rejected under 35 U.S.C. 102(e) as being anticipated by Parker et al. USPN 6443164.

As to claims 1, 15, 16, 32, 33, 35, 37, 38, 41, 44, 45, and 50, Parker discloses a spray chamber 10 for applying a composition to a user, comprising chamber walls 20, a plurality of spaced apart stationary nozzles 51, which provide an overlapping spray pattern and a compressor 82 (col. 7, lines 30-52/ col. 8, lines 14-20; col. 8, lines 51-55; col. 8, lines 51-56; col. 15, lines 23-33; Figures 3 and 4). As shown in Figures 1, 3, and

Art Unit: 3761

4, the nozzles are positioned horizontally along at least a portion of the spray area at the wall and emit a composition into the spray area in an overlapping spray pattern (Figure 6).

As to claims 2-6, 11-14, 20-23, 26, 28, 34, 39, 46, 47, 48, and 49 see Figures 1, 3-11; col. 7, lines 33-52; col. 8, lines 11-22; col. 10, lines 27-46; col. 11, lines 44-55).

As to claims 8, 25, 27, 42, and 43, see col. 12, lines 42-61.

As to claim 10, the limitations of the user remaining stationary is directed to an intended use of the article. Intended use must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). If the prior art structure is capable of performing the intended use, then it meets the claim limitations.
